

Naetirat Songsomboon (Nae)

naetirat.s@gmail.com | linkedin.com/in/naetirat-songsomboon

Master's student with 5 years of backend engineering experience in the data analytics industry, specializing in building scalable and maintainable systems. Interest in software architecture and the design choices behind robust, evolvable systems.

Technical Skills

- **Programming Languages:** TypeScript, Go, Python
- **Frameworks:** Next.js, Fastify, Fiber
- **Databases & Storage:** MongoDB, Redis, MySQL, AWS S3
- **Message Queuing:** RabbitMQ, AWS SQS
- **Cloud & DevOps:** Git, Docker, Kubernetes, GitHub Actions, ArgoCD, AWS (EC2, ECR, EKS, Lambda, API Gateway, SAM, Amplify)
- **Software Architecture:** Clean Architecture, Microservices

Experience

Jan 2023 - Aug 2025 **Senior Software Engineer**, Wisesight (Thailand) Co., Ltd., Thailand

- **Led a team** in developing web applications for social media influencer discovery and data analytics, managing the full stack from frontend, backend, and infrastructure using TypeScript, Go, and deployed on AWS cloud infrastructure.
- **Developed an internal logging library** in TypeScript, enabling control over logging formats and centralized logging, significantly improving debugging efficiency for the product development department.
- **Introduced and supervised a facilitator rotation system** for team activities, fostering leadership skills among team members. This initiative was recognized by the team members for its positive impact on career growth and team dynamics.
- **Designed scalable and maintainable software** using Clean Architecture principles, enhancing development velocity and promoting long-term code quality.
- **Created an API template** in TypeScript to streamline the development process, serving as a standardized baseline for the product development department.

Jun 2019 - Dec 2022 **Software Engineer**, Wisesight (Thailand) Co., Ltd., Thailand

- **Developed a data collection pipeline** allowing the company to collect over 1 million messages daily from various social media platforms.
- **Developed a centralized social media platform API** for efficient data collection and management from a single interface.
- **Developed a data tiering system** to prioritize data collection within the time and resource limitations.
- **Designed and implemented internal tools** to optimize the issue support process, significantly reducing the average team issue closing time.
- **Managed product documentation** to ensure accurate and detailed records of all features and functionalities.
- **Trained and onboarded new engineers**, accelerating their integration and productivity within the team.

Education

August 2025 - Present **Master's Degree in Computer Science and Engineering**, Netherlands
Eindhoven University of Technology (TU/e)

Languages proficiency

Thai	Native
English	Professional working (B2)
Dutch	Elementary (A1)
